-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U. S. C. 121:
 - I. Claims 1-5 and 13, drawn to a method for obtaining a biologically active botulinum toxin comprising providing a fermentation medium that is substantially free of an animal derived product; culturing a clostridium botilinum bacterium in the medium to produce a botulinum toxin; and recovering the toxin; and a method of making a substantially animal product free pharmaceutical composition containing the botulinum toxin, classified in class 424, subclass 239.1, and class 435, subclass 252.7.
 - II. Claims 6-9, drawn to a method for obtaining a botulinum toxin comprising providing a first medium that is substantially free of an animal derived product and that comprises a protein product derived from a vegetable; culturing a clostridium botilinum bacterium in the first medium to permit the growth of clostridium botulinum; providing a second medium that is substantially free of an animal derived product and that comprises a protein product derived from a vegetable; inoculating the second medium with the first medium; culturing a clostridium botilinum bacterium in the second medium to produce a botulinum toxin; and recovering the toxin, classified in class 424, subclass 239.1, and class 435, subclass 252.7.
 - III. Claims 10-12, drawn to a composition comprising clostridium botulinum and a culture medium that is substantially free of an animal derived product and that comprises a protein product derived from a vegetable, classified in class 435, subclass 252.7.
2. The inventions are distinct, each from the other because of the following reasons:

Art Unit: 1656

The product of Invention III and the methods of Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the methods of Inventions I and II are alternative processes of use of the product of Invention III.

The methods of Inventions I and II are patentably distinct each from the other because they have different method steps, and produce different results.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their recognized divergent subject matter, and because each invention requires different searches but are not co-extensive, examination of these distinct inventions would pose a serious burden on the examiner and therefore restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
